

STANFORD Vortragsreihe

Einladung zur 1. Veranstaltung im Rahmen der Stanford Vortragsreihe

Thema **Computer Support of Collective Work**
Prof. Charles Petrie
Center of Design Research and Stanford CS Logic Group
Stanford University, Palo Alto, Kalifornien

Termin Donnerstag, 10. November

Zeit 14.00 – 15.15 Uhr

Ort Besprechungsraum AutoUni, ICW Haus 6, 1.OG
Major-Hirst-Str. 11

Wolfsburg, 7. November 2005

Ansprechpartner:

Dr. Klaus Schaaf

Telefon +49 5361 897-8690

Telefax +49 5361 897-8619

klaus.schaaf@volkswagen.de

Sehr geehrte Damen und Herren,

Im Rahmen der Kooperation zwischen dem Center of Design Research der Stanford University und der Volkswagen AutoUni begrüßen wir Prof. Petrie zur Auftaktveranstaltung der neuen Stanford Vortragsreihe. Der Vortrag wird in englischer Sprache gehalten.

Abstract

Several new IT technologies have become popular in large enterprises because they increase information sharing across temporal, disciplinary, and organizational boundaries. Among these are wikis, blogs, and web services. These are indicative of the larger problem of people, and their computers, working collaboratively on individual objectives that are related by common design goals and/or constraints, as well as information requirements and resource constraints.

As enterprises grow larger and produce more complex and customized artifacts, the IT support of such "collective work" becomes even more important. Traditional process management techniques based upon pre-defined and largely static workflows become increasingly inadequate as the enterprise and its environment require more change. We describe some emerging technologies that address these requirements.
